Our ottomans are ingenious in many ways. They are, of course, excellent as footrests, but they can also be used as tables or storage spaces. The Stressless® Double Ottoman offers ample space to put your feet up, and the storage space hides a tabletop which can be placed over the ottoman. The Stressless® Oval Ottoman has a removable pillow, so it doubles up as a convenient table.

◀ The Stressless® Sector (SC) and Stressless® Sector Arm (SCA) with table are upholstered like the sofa and hide a storage space under the top. The Sector/Sector Arm also function as an armrest, which is why setups with Sector/Sector Arm should be treated as a fixed unit.

▶ Ekornes® Corner Table (CT) combines the need for a table with the need for individual positioning of the chairs and sofas. The Corner Table is free-standing, allowing you to re-organise the furniture when needed. Corner Table can be placed with any chair/sofa combination.

EKORNES® OFFERS FOUR TYPES OF LEATHERS – EACH IN A FULL RANGE OF COLORS

BATICK is a corrected, pigment improved and grain embossed upholstery leather, which has had most of its natural marks removed. Batick may have a two-tone color effect to liven up the surface. Batick is resistant to fading, although changes in color will occur over time due to use and exposure to light. A protective layer of lacquer simplifies cleaning. Simple cleaning, excellent durability and a reasonable price make Batick a good choice.

CLASSIC is a corrected, pigment improved and grain embossed upholstery leather. Classic is somewhat thicker and has a larger pebbled grain than Batick. Most of its natural marks are removed. Also, some of the Classic colors have a two-tone color effect to liven up the surface. A protective layer of lacquer simplifies cleaning. Classic is a wise choice if you want leather with excellent durability.

PALOMA is a slightly corrected leather with a combination of dyes and pigments that smoothes down some of the structure (the grain pattern) of the leather. The grain structure in Paloma may, however, vary a little at some parts of the furniture, and also minor color nuances may appear in the leather. Natural marks, scars and insect bites are natural and will appear in Paloma. A thin coat of lacquer gives Paloma some protection and simplifies cleaning, but Paloma does not have the same heavy-duty quality and protection as Batick and Classic. Due to its soft, natural and comfortable expression, Paloma is a very popular choice.

ROYALIN is the most exclusive of Ekornes's leather types, but also the most vulnerable. Royalin is a type of leather with natural pebbled grain and structure, and may have minor color nuances and some natural marks. This is characteristic for a natural material such as Royalin. A very light surface treatment provides a certain protection, but Royalin absorbs moisture easily, and is extra vulnerable to wear and tear, heat, sunlight, spills and perspiration. This requires greater care in use and more vulnerability to influence from direct contact with human skin (especially from neck/hair and hands). Royalin has the softness and a rich warm glow that characterize first-class furniture leather. Variances including grain pattern and color are an inherent feature within Royalin leather and are a natural mark of high quality.

Ekornes® upholstery leather

Ekornes is one of Europe's largest consumers of leather. We purchase the leather from selected tanneries all over the world. Our own inspectors take part in the leather selection, which is conducted in accordance with international norms for quality determination. The experience we have gained from this work is for your benefit when you buy Stressless® or Ekornes® leather furniture. Our leather is manufactured according to current laws, guidelines and recommendations on durability, and for the use and content of chemicals and other substances. We are cooperating with recognized international institutions in this line of business, to ensure that we are updated at all times with events relating to health, safety and the environment.

The leather for our furniture is a natural material that comes from cattle hides.

When the hide has gone through a tanning process and further processing to achieve the correct durability properties, it is called leather. One characteristic of a hide is that it is marked by nature, vegetation and the care the animal has been subjected to. Cattle spend most of their lives outdoors, and will therefore be marked by external influences like insect bites, tears, scars, wrinkles, stretch marks, etc.

The following are some of the properties of leather that you should be aware of:

Leather is a natural product and is a beautiful and lively material used in furniture making. Each hide is unique in its structure, appearance, nuance and size. Ekornes may use several hides when making your furniture. This, together with the leather's play of colors and natural marks, makes each piece of furniture unique. In time, the leather will age and gain patina. It is important that you are aware of one thing: although leather furniture can withstand a lot of wear and tear, its appearance will change with the years.

The following applies to all types of leather used by Ekornes:

Hide absorbs dyes differently and therefore the leather may have color nuances. These are due to dissimilarities and different fiber structures, which affect the coloring of the hide and how the hide absorbs the dyes during the tanning process.

All our leather qualities are deep-dyed, but there could always be a deviation between the basic color of the hide (the color of the side that faces the upholstery side of the furniture), and the color of the grain side (the external side) i.e. the color of the outer layer. This is normal. It is possible to use the same basic color for leathers with different top colors.

Dyes and dyeing methods may vary between the different leather colors and leather qualities. Therefore, the basic color and the color of the top layer (which forms the wear layer and the final desired color of the finished product) of a given leather quality may differ.

Some of the leather dyes have a two-tone color effect (shadow/antique effect). Leather dyed with a two-tone effect may change character faster and wear more unevenly than leather with just one color. This applies in particular to areas of the furniture that are exposed to harder wear such as armrests, seat cushions and neck supports.

The top layer protects the leather and simplifies cleaning, but is nonetheless vulnerable to soiling and wear. If the top layer/top color is destroyed, the leather may deteriorate faster. Penetrating spills/damage/scratches are normally irreparable and may result in the top color changing character, cracking or peeling off.

Please note that denim clothing and jeans may leave color on the leather, which is difficult to remove without risking destruction of the top color of the leather. Light leather colors, in particular, are vulnerable to such color contamination.

All furniture leather sold by Ekornes is resistant to light, but changes in color may occur as a result of use and extensive exposure to light. Consequently, furniture should not be exposed to direct sunlight or direct heat from heaters and other sources of heat. Leather is vulnerable to exposure to oils from direct contact with human skin (especially of the neck and hands).

Remember: leather has a relatively long life-time, but can easily be destroyed by incorrect handling.

Stressless® Leather and Fabric Care kits

To match the high quality of our furniture, Ekornes now offers its own leather and fabric (including microfiber) care series.

The Stressless® Leather Care kit (medium, large) and the Stressless® Leather Care Wipes contain a leather cleaner, a protection cream and wipes. For nurturing, and making the leather more resistant to stains, the protection cream should be applied to all leather surfaces when your recliner is new. For later treatment,

in addition to regularly removing stains, we recommend that the leather is cleaned with the Stressless® Leather Cleaner at least every 6 months. Always apply protection cream after cleaning. Please see www.ekornes.com for further information about maintaining your leather furniture.

The Stressless® Fabric Care kit contains a fabric cleaner, a stain remover and 'Ox cleaner'. This kit gives you everything you need to clean a piece of furniture in just minutes, without removing the fabric cover. For resistant stains, use the Fabric Cleaner together with the Stain Remover and 'Ox Cleaner'.

These are the only cleaners Ekornes will approve. Ekornes will decline all responsibility in cases where other products than those approved by Ekornes have been used to maintain your leather and fabric furniture.

Stressless® Fabrics

Our specially selected fabric collection meets the most severe requirements in the furniture trade.
